

How Will We Be Evaluated?

❖ Dataset Analysis

- Were we able to properly assess and clean the dataset?
- Is our conclusion meaningful, accurate, and credible?
- Are we telling a story that connects the challenge to our final marketing decision?

❖ AI / ML Solution

- Is the AI approach we chose realistic, scalable, and does it well suit our problem?
- Can we explain our AI / ML solution clearly and visually without complex vocab?
- Have we addressed responsible AI, and does it adhere to user privacy and fairness?

❖ Business Insights & Recommendations

- Is our recommendation practical and implementable?
- Does our solution align with the needs of FusionTech?
- Can we clearly model and quantify the expected final business impact? Is this believable?

❖ Dell Infrastructure Recommendation

- Why did we choose this particular Dell product for our AI workload?
- How does this product compare to the alternative available products?
- Are we sure that this product could help solve FusionTech's infrastructure problems?

❖ Presentation Quality

- Is our presentation clear, engaging, and well-organized?
- Does every member of our team participate in the presentation?
- Is our slideshow professional and visual? Have we avoided a lot of heavy jargon?

➔ Keep the presentation **visual**, use a lot of charts, diagrams, and images. Make sure we tell a **story** from problem to impact. Make sure the presentation is under 10 minutes. Executives care about **ROI**, not **technical details**.
